About This Game

The Station is a first-person sci-fi mystery set on a space station sent to study a sentient alien civilization. Assuming the role of a recon specialist, players must unravel a mystery which will decide the fate of two civilizations.

How would you react if we discovered a sentient alien civilization, challenging everything we know about biology, chemistry, physics, religion and answering the questions man has asked throughout history? But what if this sentient alien civilization was discovered in a state of civil war? Determining that the rewards outweigh the risks, an undetectable space station with a small three-person crew deploys to research the alien culture in search of a means towards a peaceful relationship. Unable to contact the crew, a recon specialist is sent to uncover what happened. What players discover will challenge their view of surveillance, imperialism and moral law.

Welcome aboard The Station.

Gameplay

A World of Augmented Reality - The future holds a progressive attitude towards how information is stored and shared.

Technology has gone through a digital revolution and conversations, notes and even computers are experienced in full Augmented Reality. Ranging from personal to professional, these AR logs will let players explore what was taking place on-board.

Intuitive Problem Solving - When a door won't open, what will you stop at to discover what lies behind it? The secrets on-board the station will resist being uncovered and you must rely on your ability to identify and solve intuitive but subtle problems

- The Station itself is a puzzle to be solved.

Piece Together a Living Story - We believe the best stories are shown not told. Each room and space will have a unique moment to share if you look close enough – as the story unravels each detail will begin to fall into place. For the keen eye, a rich story awaits.

Title: The Station
Genre: Adventure, Indie
Developer:
The Station
Publisher:
The Station
Release Date: 19 Feb, 2018

a09c17d780

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7 or higher, 64-bit

Processor: Intel Core i5-2500k or AMD equivalent

Memory: 4gb GB RAM

Has few jump scares, nothing a wimp like me couldn't handle tho. Puzzles were alright, and the ending took me by surprise. "free explore" mode is great, just so you can go back and check what you missed without limitation. In conclusion : I thing this game is short, sweet and well worth the buy.

Oh, and btw: Runs nicely on Linux.
